# Computer Software

Dragon NaturallySpeaking is a speech recognition program designed to allow users to dictate documents, send emails, search the Internet, and to control their computer by the use of their voice. It provides new levels of personal productivity with ease.

*[Suite 1]*

Kurzweil 3000 is a text-to-speech learning tool that makes reading, writing, test taking, and accessing a curriculum accessible to all students. It is particularly appropriate for students with learning disabilities such as: dyslexia, those who require reading intervention, students who are struggling with reading comprehension, and students of English as a second language (ESL).

*[Suite 1 and 3]*

JAWS is a powerful accessibility tool that reads text on your screen using synthesized speech. JAWS provides many useful commands that make it easier to use programs, edit documents, and read web pages.

*[Suite 1]*

ZoomText is a fully integrated magnification and screen reading program that enlarges, enhances, and reads aloud everything on the computer screen.

*[Suite 1 and 3]*
